

Igenity® – Confident Selection

Neogen US Genomics

3VDV Results Report

4131 North 48th Street

Method - BVDV Antigen ELISA test

Lincoln, Nebraska 68504

(402) 435-0665 - dnahelp@neogen.com

Customer Information

Customer Name: Noche Linda Farms

Customer Address: 461 College Rd

Paris KY 40361-9581 US

Customer Phone: 8597077004

Customer Email: nochelinda@roadrunner.com

Customer Account ID: NOC010

Order Information

Report Date: 12/12/2025

Order Date: 12/8/2025

Igenity Order ID: 200397

Lab Order ID: 1217700

Order Completion Date:

Thank you for using Igenity for your genomic testing needs.

Your results are contained in the following pages.

Please be sure to check the 'Animals Not Reported' and 'Positive Confirmation Report' pages to see if any action is required of you.

Please don't hesitate to contact us if you have any questions or concerns regarding your Igenity order.

Results Key

<i>Negative</i>	No BVDV detected; sample negative for BVDV Persistent Infection (PI).
<i>Positive</i>	BVDV detected; sample positive for BVDV Persistent Infection (PI). *Confirmation of BVDV status is strongly recommended.
<i>Inconclusive</i>	Sample tested weakly positive for BVDV but a final diagnosis regarding the BVDV status cannot be made at this time. Presence of BVDV may be from recent vaccination with modified live vaccine, from recent BVDV infection, or from being truly PI. **Confirmation of actual BVDV status is strongly recommended.
	**It is highly recommended that all positive samples have a fresh ear notch <u>and</u> whole blood sent in for confirmatory testing. <i>Confirmatory testing is conducted at no charge.</i> • Samples should be collected at least 3 weeks after previous sample was taken. • The ear notch can be stored in a plain red top tube or a clean ziploc bag (do not store sample in formalin). ◦ Whole blood should be in a purple top tube. ◦ The samples should be sent with an ice pack. • The samples can be sent directly to Neogen from the customer. • There should be a note that indicates that this is confirmatory BVDV testing as this will ensure that we can provide the fastest results and ensure that no charge is invoiced for the confirmatory order. • To streamline the process it would also help to have the package sent with Attn to Vet Diagnostics.
<i>Disclaimer</i>	• The laboratory is responsible for all information provided in the report with the exception of the sample ID which is provided by the customer. • The laboratory is not accredited for sampling, samples were tested as received and the laboratory cannot be held liable for the accuracy of the information provided
